

Race Around Australia (RAA) basics

Map layers

The RAA map can be filtered to display 4 different views and are designed to accommodate different types of participation in RAA. The layers in the RAA schools challenge are:

- **Class map** - shows all student pins from the class.
- **School map** (shown below) - shows all class pins within the school. This is the default map layer.
- **Directorate map** - shows all school pins from the same School Operational Directorate.
- **Top 50 map** - shows your school pin and the Top 50 school pins across the whole RAA school challenge.

To filter the map layers, simply select the drop down and choose which map layer you wish view. Each map layer offers a different perspective on challenge and is a great way for schools to imagine and engage with the challenge in any creative or competitive way they like.

For example, competitive schools may favour the 'Directorate' or 'Top 50' view for more of a challenge. Schools just wanting to have a go, may prefer the 'School' or 'Class' map layer which keeps the challenge focus more local and without pressure.
